

# Integrated Strategic Commissioning and Co-design with Local People

ICS Forum event  
4<sup>th</sup> Dec 2020

# Introduction to integrated strategic commissioning

## Our Aim

**To improve outcomes for the people of Surrey, enabling them to live healthy and fulfilling lives.**

## Our Approach

**We aim to achieve this through transforming the way health and local authority commissioners work together and with partners and communities.**

## Health and Wellbeing

**We are taking a broad view of “commissioning”, recognising the importance of co-design and wider determinants of health and wellbeing**

# Summary of overall themes

We have found some common themes across commissioning for carers, people with learning disabilities and autism, mental health and continuing healthcare (CHC).

**Co-design, co-production and co-evaluation**

Building on progress

Working with communities and partners to support vulnerable residents

Transitions and preparing for adulthood

Crisis support

# Ways to improve co-design in commissioning

In speaking with commissioners, providers and wider partners, we identified some key areas where we want to do more to improve the way we co-design.

Making use of a wider, more engaging and more inclusive range of methods for co-design

Reaching a wider group of participants

Feeding back and demonstrating impact better

# Break-out discussion - your views on co-design!

Please consider your responses to one of these questions in your breakout groups. The facilitator in your room will make notes during the discussion and these will be fed back to inform next steps for the programme around co-design.

Rooms 1,2  
and 3

- How can we better engage and involve local people in designing services?

Rooms 4, 5  
and 6

- How can we involve local people more in governance and decision-making?

Rooms 7, 8  
and 9

- How can we best demonstrate to local people the impact that their involvement in co-design has?

20mins
